

Dataset Information File

Dataset Title: Customer Orders & Sales Analysis Dataset

Description: This dataset contains transactional customer sales data used for performing advanced Exploratory Data Analysis (EDA).

Columns: order_id, customer_id, product_category, order_date, quantity, price, total_amount, payment_method, location.

Size: Approximately 500–1000 records with 8–10 features.

Data Issues Identified: Missing values, duplicate records, inconsistent text formatting.

Preprocessing Steps: Missing value imputation using median, duplicate removal, text normalization, and feature engineering.
